

5 Operating System

30 April 2023

Notes

1. BIOS stands for Basic Input Output System. It is software stored on a small memory chip on the motherboard that is responsible for the POST (Power-On Self-Test) and therefore makes it the very first software to run when a computer is started. The BIOS firmware is non-volatile, meaning that its settings are saved and recoverable even after power has been removed from the device.
2. Firmware is a type of software used to access the devices. BIOS is type of firmware. Firmware example includes UEFI (Unified Extensible Firmware Interface). Newer version of BIOS known as UEFI address the shortcomings of the BIOS.
3. Booting/Starting of computer
 - a. When you turn on your computer, the BIOS is the first program that runs. It's a piece of code that resides on the motherboard that connects the hardware and software.
 - b. The BIOS performs a power-on self-test (POST) to check that all the hardware components are working correctly.
 - c. BIOS looks for a bootable drive to start the operating system. The first sector of this drive contains the Master Boot Record (MBR) which contains the information about how the hard drive is partitioned and where to find the operating system bootloader.
 - d. BIOS starts the bootloader specified in the MBR. The bootloader is responsible for loading the operating system. The specific details of this process can vary depending on the operating system being loaded.
 - i. For example, in the case of Windows, the MBR starts the Windows Boot Manager which then starts the Windows loader (Winload.exe).
 - ii. In the case of Linux, the MBR might start a bootloader like GRUB which then loads the Linux kernel.

```

Note that the Color is inverted above.

4. Computer software can be classified as
 - a. System software
 - i. OS (Operating Systems).
 1. Commercial/Preparatory - Requires license.
 - a. Microsoft Windows. e.g. Windows 7, Windows 10.
 - b. Apple Mac OS.
 2. Free and Open Source
 - a. Linux and their versions. e.g. Ubuntu, Fedora, OpenSuse. Ubuntu uses an easy way of referring versions like Ubuntu 23.04 means Ubuntu version year 2023 April. They have release cycles every 6 months so Ubuntu 22.10 means year 2022 October version.
 - b. Based on Linux operating systems. e.g. Isuru Linux released by the Department of Education, Kandana Linux.
 - c. Most of the linux distributions can be found via <https://distrowatch.com/>
 3. Based on the Interface
 - a. CLI (Command Line Interface).

- i. DOS/MS DOS (Microsoft DOS - Microsoft Disk Operating System).
- ii. UNIX
- b. GUI (Graphical User Interface). Most of the GUI uses WIMP (Windows, Icons, Menus, Pointers) while smart phones generally does not have Pointers. Icons helps the users to identify the task it can perform by looking at it.
 - i. Windows
 - ii. Linux
 - iii. Android
- 4. Based on the usage.
 - a. Single user single task - DOS.

survey of Operating Systems

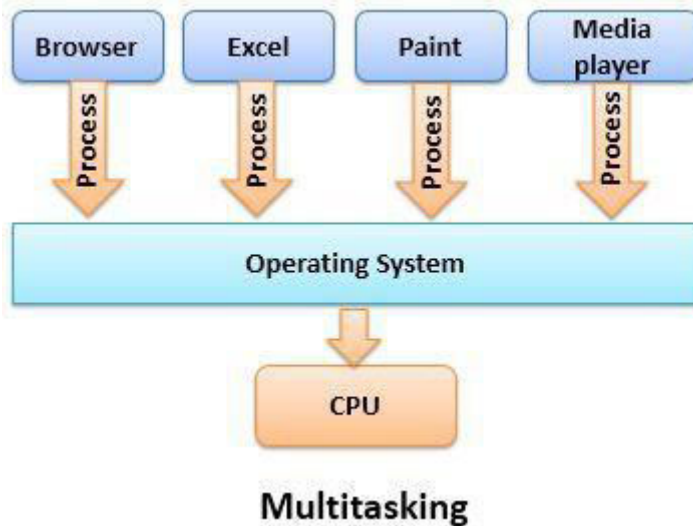

Figure 1-4 Single-user/single-tasking

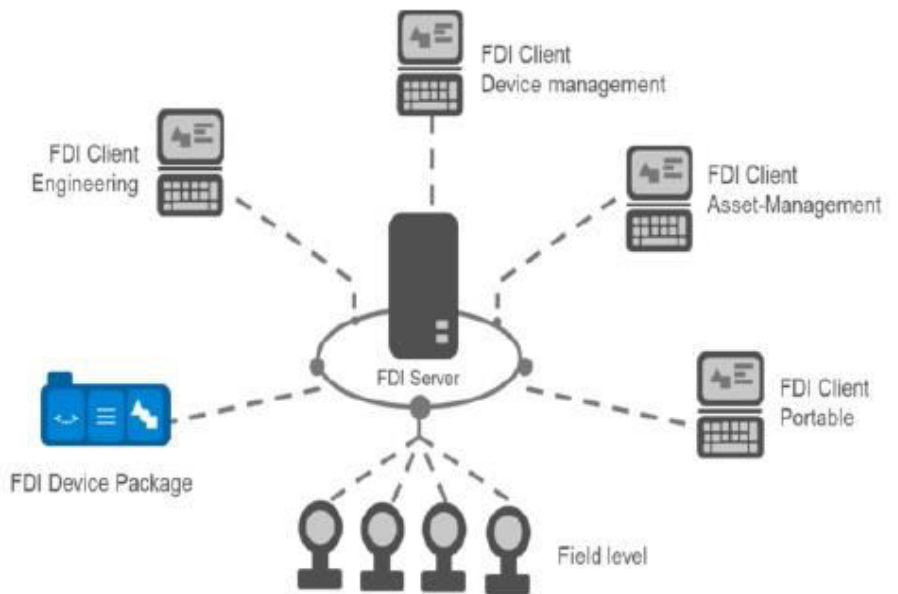

23

© 2012 The McGraw-Hill Companies, Inc. All rights reserved.

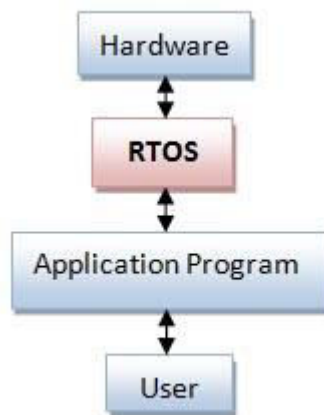

- 2. Single user multi task - Windows.

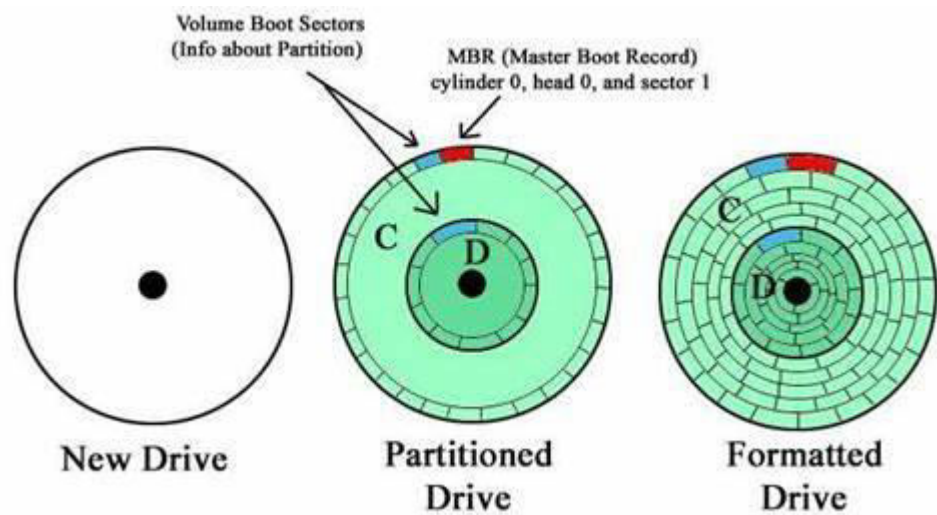

- c. Multi user Multi task - Windows Server.

- d. Realtime - Often flight control system uses Realtime Operating Systems.

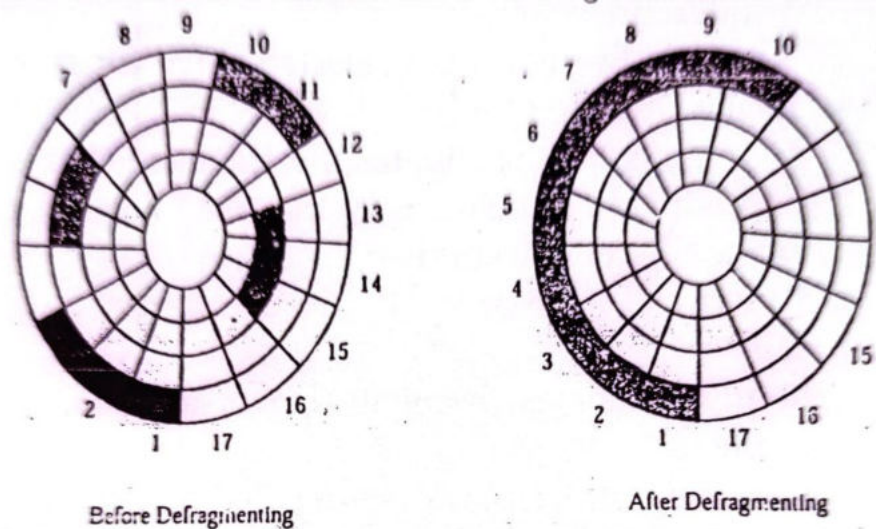

5. Based on File System
 - a. FAT - File Allocation Table. Does not officially supports UNICODE.
 - b. NTFS - New Technology File System. Does officially supports UNICODE.
 - c. exFAT - (Extended FAT). Developed by Microsoft to support the devices that does not support NTFS and to overcome disk size limitation of 32GB for FAT32.
2. Utility software's.
 - a. Disk partition - Though not a must but it is better to partition drive atleast two one of the OS and other for data. So that in case if the OS fails can be reformatted without losing the data. First software to install after formatting the drive is known as OS (Operating System).

2. Disk defragmenter

Defragmenting hard drive can increase the computer performance by making it an efficient access to files. Fragmented files makes computer slower. Defragmentation reduces the fragments and makes computer faster. This is used for the magnetic hard drives. SSD (Solid State Disk) uses TRIM utility.

3. Antivirus software - Protect the computer from Virus Infections.

b. Application software

Application softwares are designed to handle specific tasks of the users.

- i. Wordprocessing software.
e.g. Microsoft Word, Libre office Writer.
- ii. Spreadsheet software.
e.g. Microsoft Excel, Libre Office Calc
- iii. Presentation software.
e.g. Microsoft Powerpoint, Libre office Impress
- iv. Database softwares.
e.g. Microsoft Access, Libre Office Base
- v. Web browsers.
e.g. Microsoft Edge, Google Chrome, Mozilla Firefox
- vi. Application software is classified as Software packages and Custom made/Tailor Made software.

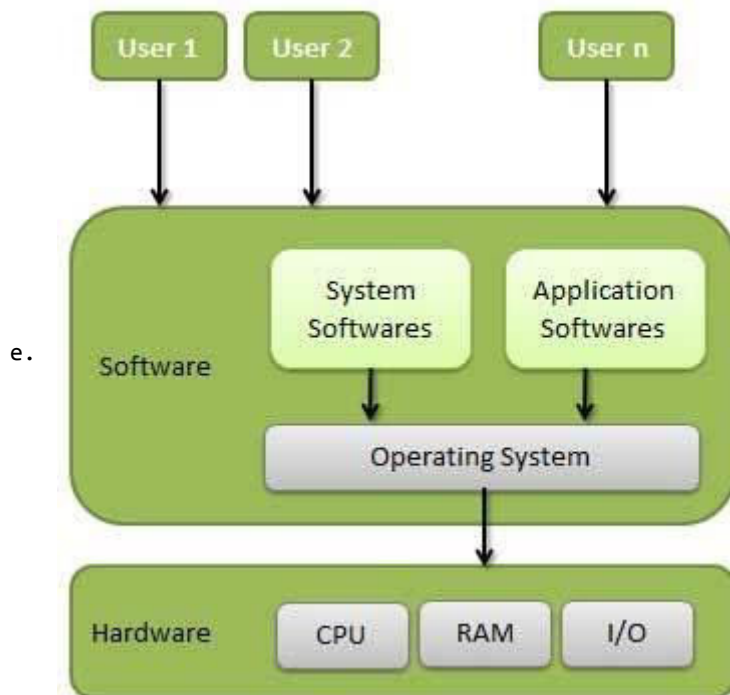

Criteria	Software Packages	Tailor Made/Custom software
Cost	Since these software developed for wide range of people cost is shared among the users. So the cost per user is low.	Since this is developed specific for an individual or an organization the cost of Tailor made software is more than the cost of a software packages.
User Interface	Standardized user interface so it is easier for the users.	Since it is designed for the specific user in mind it can be a complex user interface.
Customer	Software packages were	Custom software is developed

Care	designed with wide range of users and often comes with standard customer care.	specifically for an individual or organization and often comes with a higher level of customer care
Bugs	Since software packages tested extensively it is likely to be small number of bugs.	Custom software is unique to the user. It may be difficult to identify and fix the bugs. So bugs can be more with custom software.

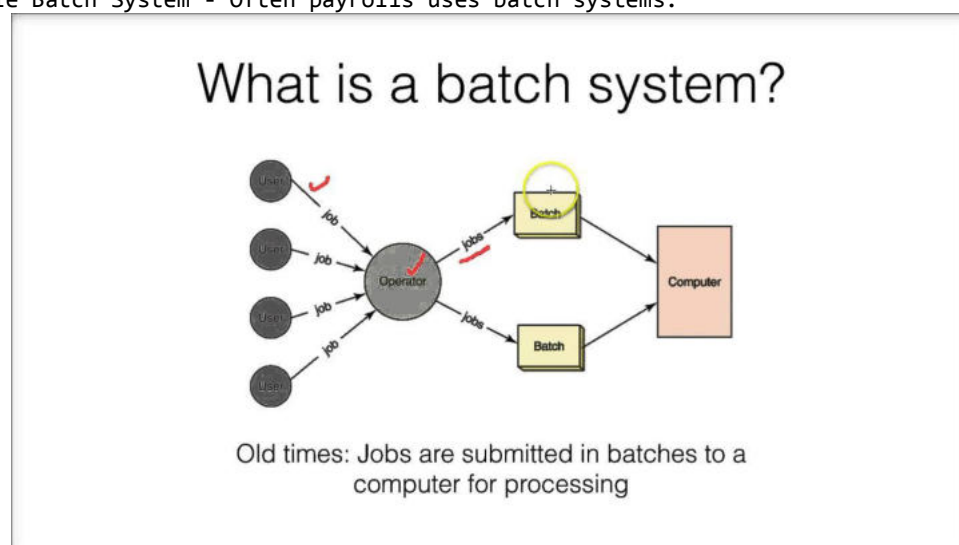

c. Language translators

Computer runs of Machine Language. If the program developed in Machine language requires no translations.

- i. Assembler - Assembler is used to convert the assembly language to machine language.
- ii. Compiler - Convert the program to machine language at once. Generally they run faster the interpreted languages. e.g. Pascal.
- iii. Interpreter - Convert the program to machine language one line at a time. Typically slower than compiled languages. e.g. Python.

6. Simple Batch System - Often payrolls uses batch systems.

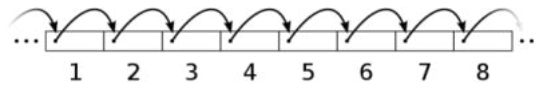

7. Functions of an Operating System (OS)

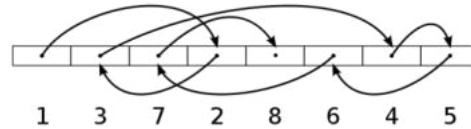

- a. Managing hardware of a computer
 - i. Process Management.
Running program or part of the running program is known as process.
 - ii. Memory Management.
 - iii. Device Management.

1. Device Drivers - software program that manages hardware components or peripherals attached to a computer and enables them to function with computer.
 2. Pnp - Plug and Play. Certain hardware like keyboard, mouse and flash drive can function once attached to the computer known as Plug and Play.
- iv. File Management.

Sequential access

1. Random access

- v. Security management.
 - vi. Network management.
- b. Providing User Interface.

MCQ

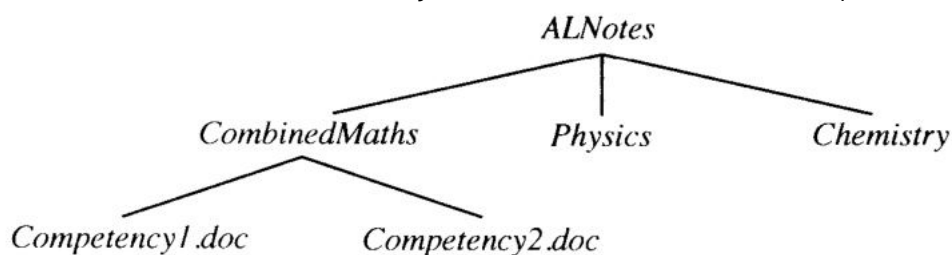

1. Microsoft Windows XP is an example of a/an OL2007MCQ12
 (1) Application software (2) System Software
 (3) System utility (4) Graphical User Interface (GUI)
2. Which of the following statements is/are true regarding an Information System? OL2007MCQ20
 A - Applications software converts data into information.
 B - Systems software controls hardware.
 (1) A only (2) B only (3) A and B (4) None of the above
3. Which one of the following operations can be used to move Text and Graphics in application programs working under the Windows operating System? OL2007MCQ21
 (1) Cut and Paste (2) Cut and Copy (3) Delete and Move (4) Erase and insert
4. Select the most appropriate statement regarding the Booting process of a Computer. GIT2007MCQ33
 1) It is the process of copying application data from main memory to cache memory.
 2) It is the process of loading the application data from hard disk to the main memory.
 3) It is the process of loading the operating system into the main memory from the cache memory.
 4) It is the process of loading the operating system into the main memory from a secondary storage device such as hard disk, CD ROM or floppy disk.
5. Loading an operating system into the memory of a personal computer is known as.....OL2008MCQ18
 (1) assigning (2) compiling (3) interpreting (4) booting
6. A sequential file organization is most suitable for a/an: OL2008MCQ37
 (1) airline seat reservation system (2) payroll system
 (3) library system (4) directory enquiry system
7. Which of the following is a core function of an operating system? GIT2008MCQ17
 1) Memory Management 2) Graphic Editing 3) Music Recording 4) Web browsing
8. Consider the following statements given below. OL2009MCQ04
 A - Sequential access files cannot be stored in floppy disks.
 B - Random access files cannot be stored in magnetic tapes.
 C - Both sequential access files and random access files can be stored in Compact Discs.
 Which of the above statements is/are true?
 1) A only 2) B only 3) A and C only 4) B and C only
9. Which of the following is/are responsible for the management coordination of activities and sharing of resources of a computer? OL2009MCQ18
 1) Application software 2) Operating system 3) System Utilities 4) Graphical User Interface (GUIs)

10. Which of the could not be considered as an operating system software? GIT2009MCQ20
1)Microsoft Windows 7 2)Mac OS X 3)Fedora 11 4)Adobe Photoshop
11. Consider the following tasks: OL2010MCQ13
A - Protecting data against viruses
B - Keeping track of files and directories (folders) in storage devices.
C - Controlling peripheral devices such as disk drives and printers
D - Providing facilities for graphic design
Which of the above are tasks of an Operating System?
1)A and B only 2)B and C only 3)A, B and C only 4)All A, B, C and D
12. Which of the following is a primary feature of an operating system? GIT2010MCQ17
1)Virus Scanning 2)File Management 3)Creating database 4)Web searching
13. Which of the following is not an operating system? GIT2010MCQ18
1)Windows XP 2)DOS 3)Linux 4)Web browsing software
14. Formatting a hard disk is a function of GIT2010MCQ19
1)a web browser 2)an operating system 3)a word processor 4)a virus scanner
15. What is the most likely reason to take backup of a hard disk? GIT2010MCQ20
1)Improve Life - time of the hard disk 2)Recover data if the hard disk is damaged
3)Connect a computer to the Internet 4)Convert data into information
16. Which of the following are open source operating system?
a - ubuntu b - Windows XP c - Open Suse
1)a and c only 2)b and c only 3)all a, b and c 4)none of them
17. The operating system : OL2011MCQ13
A - fills the gap between the hardware and the user by providing an interface.
B - provides Internet facilities to the user for communication and access to information.
C - manipulates files and folders.
Which of the above statements are correct?
1)A and B only 2)A and C only 3)B and C only 4)All A, B and C
18. Which of the following statements best describes the result of the hard disk "fragmentation"? AL2011MCQ22
1)Hard disk data access speed is reduced 2)Network access speed becomes slow
3)Hard disk becomes totally inaccessible 4)Some data will be erased from the hard disk
5)Number of bad sectors get increased
19. Consider the following statements about operating systems: AL2011MCQ42
A - Ubuntu is an open source operating system.
B - Windows XP is a proprietary operating system
C - Linux is a proprietary operating system
Which of the above statements is/are correct?
1) A only 2)B only 3)C only
4)A and B only 5)A and C only
20. Which of the following is/are true about Open Source Software? GIT2011MCQ10
A - MacOS is an example for a Open Source Software
B - The basic code of Open Source software is free to download
C - Ubuntu and Open Suse are some example of Open Source Softwares
1)A only 2)B only 3)A and C only 4)B and C only
21. Which of the following operating systems uses/use the concept of File Allocation Table (FAT)? GIT2011MCQ11
A - MS Windows B - Linux C - MS DOS
1)A only 2)A and B only 3)A and C only 4)all A, B and C
22. Which of the following is a function/are functions of an operating system?GIT2011MCQ12
A - File and folder (directory) management
B - Controlling input/output devices
C - Providing access to the internet
1)A only 2)A and B only 3)A and C only 4)all A, B and C
23. Which of the following statements is correct regarding folders in a computer? OL2012MCQ13
1)Folder names cannot be altered (renamed).

- 2)Folders are used to store files in an organized manner.
 - 3)Maximum number of folders that can be created within folder is 10.
 - 4)One folder can store only the files of the same type.
24. Vimal typed a document using the keyboard of a computer and printed it. The basic tasks performed by the operating system of the computer in this instance can be best described as GIT2012MCQ17
- 1)File and folder management 2)Process Management
 - 3)Controlling input/output 4)Storage management

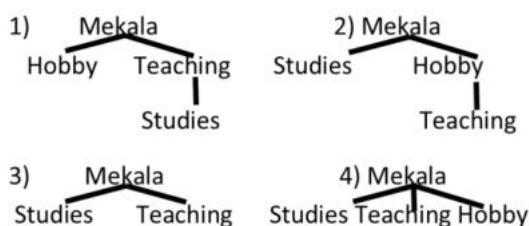

25. Consider the following statements A and B GIT2012MCQ18
 A - An operating system allows users to interact with and control a computer
 B - Graphic User Interface of an operating system makes it convenient for users to interact with and control a computer.
 Which of the following is correct in relation to statements A and B given above?
 1)Both A and B are true 2)A is false but B is true 3)A is true but B is false
 4)Both A and B are false
26. It is a good habit to create duplicates of your files/folders in an external hard disk in order protect them from accident deletion. This task is known as
 GIT2012MCQ19
 1)Defragmentation 2)Backing up 3)Disk cleanup 4)Disk formatting
27. Computers allow different users to customize the desktop theme according to their preference. Which of the following function of an operating system controls this activity? GIT2012MCQ20
 1)Folder management 2)Process management 3)File management 4)User account management
28. The type of operating system that is most suitable for an automated air traffic control system is
 1)multi-user multi-tasking 2)single-user multi-tasking 3)real-time 4)single-user single-tasking 5)multi-threading
29. The main advantage of creating more than one partition in a hard disk is the
 AL2012MCQ41
 1)separation of the operating system and program files.
 2)ability to retrieve files efficiently.
 3)easiness of making directories and subdirectories.
 4)easiness of creating multiple users.
 5)easiness of taking backups of selected files.
30. Consider the given diagram. Which of the following is most suitable for labels 'X' and 'Y'? OL2013MCQ02
-
- 1)X = Operating system, Y = Application Software
 2)X=Operating system, Y=Operating System
 3)X=Utility software, Y=Operating System
 4)X=Application software Y=Utility software
31. Which of the following is/are direct function(s) of an operating system? OL2013MCQ13
 A - managing user accounts
 B - managing memory of the computer
 C - check the spellings of word in a document
 1)A only 2)A and B only 3)B only 4)B and C only
32. Which of the following is an/are example(s) for Utility software in a computer system? GIT2013MCQ06
 A - Compiler, B - Word processing software, C - Web browser, D - Disk defragment
 1)A only 2)B and D only 3)C and D only 4)A and D only
33. Consider the following statements A, B and C GIT2013MCQ22
 A - Checking for computer viruses B - Managing directories and files C - Controlling input/output files
 Which of the above statement represent some functions of an operating system?
 1)A and B only 2)B and C only 3)A and C only 4)All A, B and C
34. What is the root directory of C:\users\grade12\git? GIT2013MCQ23
 1)users 2)grade12 3)git 4)C:\
35. Assume that the free space in the hard disk of your computer is very low. You want to make some free space without deleting any of the files that you saved. Which of the following system tools could be used for this purpose? GIT2013MCQ24
 A - Disk cleanup B - Disk defragmenter C - Character map
 1)A only 2)B and C only 3)C only 4)A and B only

36. Sharing a single microprocessor among number of applications programs using context switching is known as AL2013MCQ06
 1)Multi-user processing 2)Multitasking 3)Multiprocessing 4)Batch processing
 5)Online processing
37. The generation of monthly salary slips of employees in an organization is an example for AL2013MCQ33
 1)Batch processing 2)Realtime processing 3)Online processing 4)Transaction processing 5)Interactive processing
38. Which of the following statements is **incorrect** regarding files in a computer? OL2014MCQ19
 1)Files are used to store data in a computer.
 2)A file name can be changed.
 3)It is possible to create folders inside a file.
 4)A file name can have an extension such as .doc or .txt.
39. Consider the following software: GIT2014MCQ20
 A - DOS
 B - Firefox
 C - Microsoft Windows
 D - Linux
 Which of the above are operating systems?
 1)A, B and C only 2)A, B and D only 3)A, C and D only 4)B, C and D only
40. Consider the following functions: GIT2014MCQ21
 A - Checking spellings in a document
 B - Managing the process that run on the system
 C - Providing an interface to the user
 Which of the above are functions of an operating system?
 1)A and B only 2)A and C only 3)B and C only 4)All A, B and C
41. Given below is a user's directory tree on the hard disk of a computer: GIT2014MCQ22

- In the above directory structure, ALNotes, CombinedMaths, and Competency1.doc are respectively.
 1)a file, a root directory and a sub-directory.
 2)a sub-directory, a file and a root directory.
 3)a sub-directory, a root directory, and a file.
 4)a root directory, a sub-directory and a file.
42. An organization purchased a word-processing software (X) from a shop. The same organization requested a software development company to develop an accounting software (Y) for its accounting activities. GIT2014MCQ31.
 Which of the following is true in this scenario.
 1)X is an off-the-shelf (packaged) software and Y is a tailor-made software.
 2)X is a tailor-made software and Y is an off-the-shelf (packaged) software.
 3)Both X and Y are off-the-shelf (packaged) software.
 4)Both X and Y are tailor-made software.
43. A key function of an Operating System (OS) software is OL2015MCQ10
 1)Checking the spelling in a presentation
 2)Counting words in a document
 3)managing hardware resources in the computer system
 4)sending and receiving email
44. Which of the following is an operating system? GIT2015MCQ16
 1) Microsoft Powerpoint 2) Microsoft Word 3) OpenOffice Impress 4) Ubuntu

45. Mehkala is a student studying English Literature, Western Music and Geography for her A/Level examinations. She also helps some O/Level students in her village by teaching them English and Mathematics: Music is her hobby, She has a lot of files on the above areas that she wants to store in her computer using a suitable directory structure. Which of the following directory structures would be the most suitable?
GIT2015MCQ17

46. Which of the following statements are correct? GIT2015MCQ18
 A - A computer can be conveniently used without an operating system.
 B - The disk defragmentation utility changes non-contiguous files on a disk to contiguous files to optimize performance.
 C - The operating system interface could be used to control the basic settings in a computer.
 1)A and B only 2)A and C only 3)B and C only 4)All A, B and C
47. Consider the following statements. GIT2015MCQ19
 A - checking the spellings and grammar of a document.
 B - controlling and operating the logic gates in the hardware.
 C - managing resources and input output devices in a computer system
 Which of the above are functions for an operating system?
 1)A only 2)B only 3)C only 4)All A, B and C
48. Consider the following statement with blank spaces. GIT2015MCQ36
software has source code that cannot be modified by anyone but the person, team or organization who created it and maintain exclusive control over it while.....software is licensed to be free to use and modify and distribute.
 Which of the following phrases are appropriate to fill the above blank spaces respectively?
 1)Closed source, commercial 2)Commercial, closed source
 3)Free and open source, proprietary 4)Proprietary, free and open source
49. Utility programs help to manage, maintain and control computer resources. Which of the following can be considered as Utility programs?GIT2015
 1)Search engines
 2)Spreadsheet software's
 3)Disk defragmentation
 4)Disk scanners
 5)Graphic design software
 6)Backup software
50. The feature in modern operating system which allows the automatic installation of new hardware devices connected to a computer is commonly known as. AL2015MCQ08
 1)Add/Remove Hardware. 2)Easy installer. 3)Plug and Play.
 4)Add Hardware Utility. 5)Fetch and store.
51. Which of the following is **not** a typical use of the Random Access Memory (RAM) of personal computer? AL2015MCQ09
 1)Keeping data for processing. 2)Holding instructions for operations. 3)Providing storage for operating system.
 4)Retaining information for output. 5)Keeping the BIOS program for boot-up.
52. Which of the following is a direct function carried out as part of memory management in an operating system? OL2016MCQ03
 1)Releasing memory when a task is completed
 2)Accessing the hard disk
 3)Organizing files in a folder
 4)Managing devices
53. What is the utility tool in an operating system that can be used to optimize the performance of a disk by changing non-contiguous files to contiguous files?
 GIT2016MCQ08
 1)Character Map 2)Resource Monitor 3)Disk Cleanup 4)Disk Defragmenter

54. Consider the following statements: GIT2016MCQ20

- A - MS-DOS is an operating system which uses a Command Line Interface (CLI).
- B - Isuru Linux and Hantana Linux are two open source systems localized by Sri Lankans.
- C - Microsoft Windows is an operating system without a graphical user interface (GUI).

Which of the above statements are correct?

- 1)A and B only 2)A and C only 3)B and C only 4)All A, B and C

55. Which of the following statements related to user accounts in an operating system are correct? GIT2016MCQ40

- A - Each person can access his or her user account with a user name and password.
- B - User accounts is a collection of information that tells which files and folders you can access, and what settings in the computer can be considered.
- C - User account does not allow you to share a computer with several people.

- 1)A and B only 2)A and C only 3)B and C only 4)All A, B and C

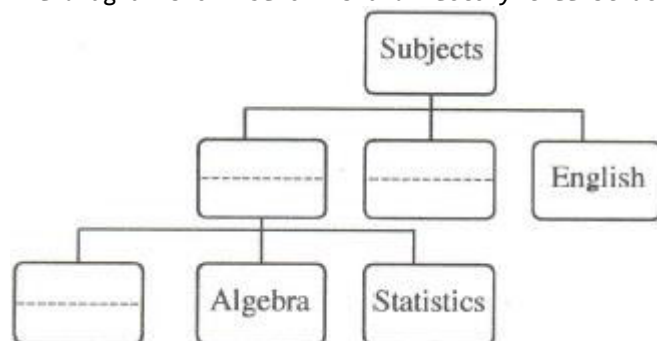

56. Consider the following scenario GIT2016

A student needs to prepare a report using a word processing software package ①. Before start typing the report, she scans the hard disk of the computer using an antivirus software ②. After completing her report, she used backup software ③ provided by the operating system ④ to back up all the files in a specific folder in the hard disk to a flash memory stick.

Identify and write down the correct software type of ①, ②, ③ and ④ in the above paragraph from the list of terms given below.

List of terms : {Application software, System software, Utility Software}.

57. The diagram shown below is a directory tree structure with blank spaces. GIT2016

Copy the diagram to your answer sheet and fill in the blank boxes with correct labels by considering the followings.

- i)'Science' is a sub directory of the parent directory 'Subjects'
- ii)The parent directory of 'Geometry' is 'Maths'

58. Consider the following statements: OL2017MCQ09

- A - Managing the hardware
- B - Providing User Interface
- C - Providing Spreadsheet and Word Processing facilities

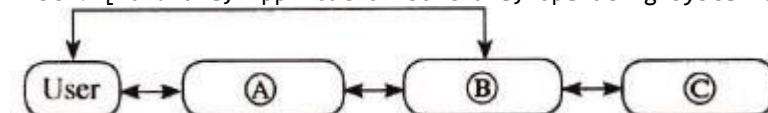

Which of the above are key services of an operating system?

- 1) A and B only 2)A and C only 3)B and C only 4) All A, B and C

59. The following diagram shows the interaction between a user and a computer system.

Identify matching terms for a labels ①, ② and ③ in the diagram from the following list. Write down the label and corresponding term. OL2017

List : [Hardware, Application software, Operating system software, Liveware]

60. Considering the following statements regarding an operating system: GIT2017MCQ35

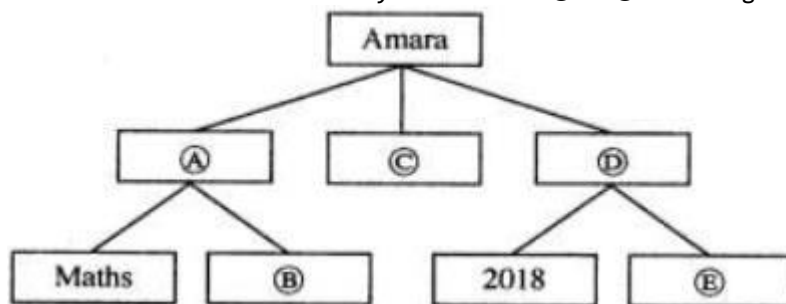

- A - It is the first program that starts when the computer is turned on
- B - It manage the resources of the computer
- C - One of its main functions is to protect the computer from unauthorized access through the network by hackers

Which of the above statements are true?

- 1)A and B only 2)A and C only 3)B and C only 4)All A, B and C

61. State whether the following statements relating to operating systems are **true** or **false**. GIT2017
(Note: Indicate only 'true' or 'false' against the relevant number. You are **not** required to write the statement).
i)Operating system provides an interface to the users.
ii)Operating system manages resources of the computer efficiently.
iii)A directory can contain files and other directories.
iv)Process management is an important task of the operating system.
62. Which of the followings is usually used to boot-up personal computers? AL2017MCQ06
1)Firmware 2)Malware 3)Adware 4)Ransomware 5)Liveware
63. Which of the followings is a main use of Complementary Metal-Oxide Semiconductor (CMOS) memory of a personal computer? AL2017MCQ07
1)Keeping inputs for processing
2)Holding instructions for operations
3)Providing space for loading operating system
4)Retaining information for output
5)Keeping Basic Input Output System settings for the booting procedure
64. The execution of a series of non-interactive jobs on personal computer with relative to the user is known as AL2017MCQ08
1)multitasking. 2)multiuser processing. 3)multiprocessing. 4)batch processing. 5)online processing.
65. When a new Pinter is connected to a computer, installing a special software is usually required for the proper functioning of the printer. What is this special software called? OL2018MCQ08
1)defragmenter 2)device driver 3)file manager 4)task manager
66. Which of the following is the first activated , when the computer switched on? OL2018MCQ09
1)Basic Input Output System (BIOS) 2)disk partitioning tool
3)Operating System 4)task manager
67. Consider the following statements AL2018MCQ36
A - Disk defragmentation makes files that are fragmented in a disk, contiguous
B - Swapping is a memory management technique where the main memory contents which were not recently used are copied to disk to make the memory available for other processes.
C - A File Allocation Table (FAT) is a table that an operating system maintains which provides a map of the clusters that a file has been stored in.
Which of the above is/are correct?
1)A only 2)A and B only 3)A and C only 4)B and C only 5)All A, B and C
68. Through which of the following, will a device controller that controls a device deal with the operating system? AL2018MCQ37
1)application software 2)assembler 3)compiler 4)device driver 5)utility software
69. Consider the following statements. AL2018MCQ50
A - BIOS is an example for application software.
B - A utility software is an example for firmware
C - Spyware is an example for malware.
Which of the above is/are correct?
1)A only 2)B only 3)C only 4)B and C only 5)All A, B and C
70. Which of the following contains only the tasks of an operating system?
1)payroll management, process management, file management
2)process management, database management, file management
3)process management, memory management, database management
4)process management, memory management, file management
71. Which of the following techniques can be used to increase the free space of a hard disk without deleting any existing files?
1)Compression of existing files on the hard disk
2)copying some files in the hard disk to a flash drive
3)formatting of the hard disk
4)partitioning of the hard disk

72. Amara wants to create a folder (directory) structure to store files methodically in his computer. He wants separate folder for his study related file of the subject Maths and science. He also wants to store all his music files separately. He further wants to store all the photos that he had taken in 2018 and 2019 separately. The following diagram shows the folder and sub-folders created by Amara. Write down the folder names indicated by the labels A - E choosing from the given list.

List : {2019, Music, Photos, Science, Studies}

73. Which of the following contains only the examples of operating systems? OL2020MCQ08
 1) Android, Ubuntu, Windows 10
 2) Ubuntu, Windows 10, Windows Explorer
 3) Android, Windows 10, Windows Explorer
 4) Android, Ubuntu, Windows Explorer
